

April 29, 2023

I strongly support the rezoning for the Blue Oval Battery Park. I believe the new factory would provide jobs for our children and economic vitality for the area along with supporting a world-wide goal of cutting carbon emissions and helping to slow or alleviate climate change. What I don't want to be part of or see in this community is a "Not In My Back Yard," commonly referred to as a NIMBY, holding back progress that is not only a national but world-wide strategic goal to save the earth.
